

Early Adopters and Innovators, Listen up! Do you want to work for a better world and cleaner oceans? Do you also think we need a new way of food production to feed future generations? Do an internship that not only gives you experience, but has an impact, with *LEGENDARY VISH!*

We at *LEGENDARY VISH* believe in a world where we can produce fish and meat without polluting the environment or exploiting animals. How we do it? By using 3D Food Printing of plant-based meats. With this technology, we produce the "fish of tomorrow", without overfishing or bycatch of whales and dolphins. Sounds like the future? Yes, and we are creating this better future with your help!

What we are looking for:

A student with a background in mechanical engineering/robotics/process engineering to support us with the following tasks:

- Technical concept of our 3D Food Printing process
- Defining required parameters (temperature, pressure, flow rate) for viscous plant-protein materials
- Technical drawings and CAD-modeling (ideally experience with Solidworks)
- Testing of our printer prototypes to create 3D printed fish, and incremental optimization of software and hardware
- Optional: Knowledge in Graphical Design/Photoshop for the creation of designs of our "Future-Sushis"
- Optional: Experience with food-related processes

Your profile: You are passionate about creating a better food system and fighting overfishing. Having your ideas heard and implemented in a dynamic startup excites you. You want to keep learning and never stop innovating. 3D Food printing and the possibilities for personalized foods of the future is fascinating to you.

A fascinating working environment in a dynamic start-up awaits you, so apply right now at **hello@legendaryvish.com** with your resume and motivation letter. At the moment, we offer an internship of 5-10 hours/week, but a job offer in the future is possible in case of positive development. We are looking forward to you and your application!
